SUMMARY

I am a computer science student at the University of Central Arkansas and I have knowledge in Java and C++, as well as building website using Bootstrap from scratch. I live a pretty simple life and my interests have, for the most part, always been related to computers. I love programming in my free time and am always looking for the opportunity to learn.

SKILLS

Java, C++, JavaScript, HTML, CSS

PROJECTS

Personal Website (2018) https://alanchanthaboune.github.io/
Build a website and gain a better understanding of HTML, CSS, JavaScript and Bootstrap. Goal is to openly share my passion and progressively update the website with projects as my career evolves.

Expert System (2017) https://github.com/AlanChanthaboune/ExpertSystem
Designed a computer system that emulates the decision-making proc of a human expert by integrating the Model-View-Controller Framework. The system allows the user the ability to query and train the system by interacting with a graphical user interface.
